

Double Dutch fold card

Ingredients:

12x12" card

Backing papers

Embellishments

Tools:

Trimmer

Method:

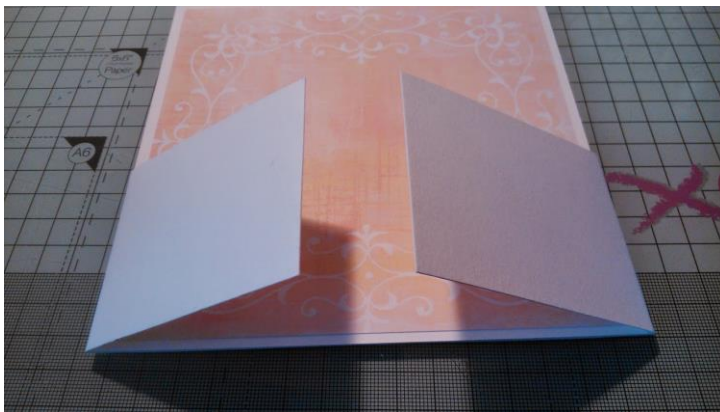

Cut the card to 6x12" and score in half to make a tent card.

Measure 2" from the bottom of the front of the card each side and then trim off.

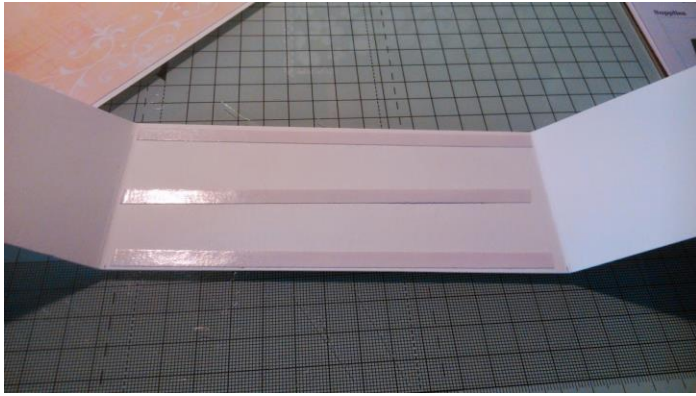

Cut another piece from the 12" piece of card 2 ½ "wide.

Make a mark 3" in from the left and the same from the right, this gives you the marks to line the base card up with. Lay the card on and score and fold the ends in to wrap around the front of the base card.

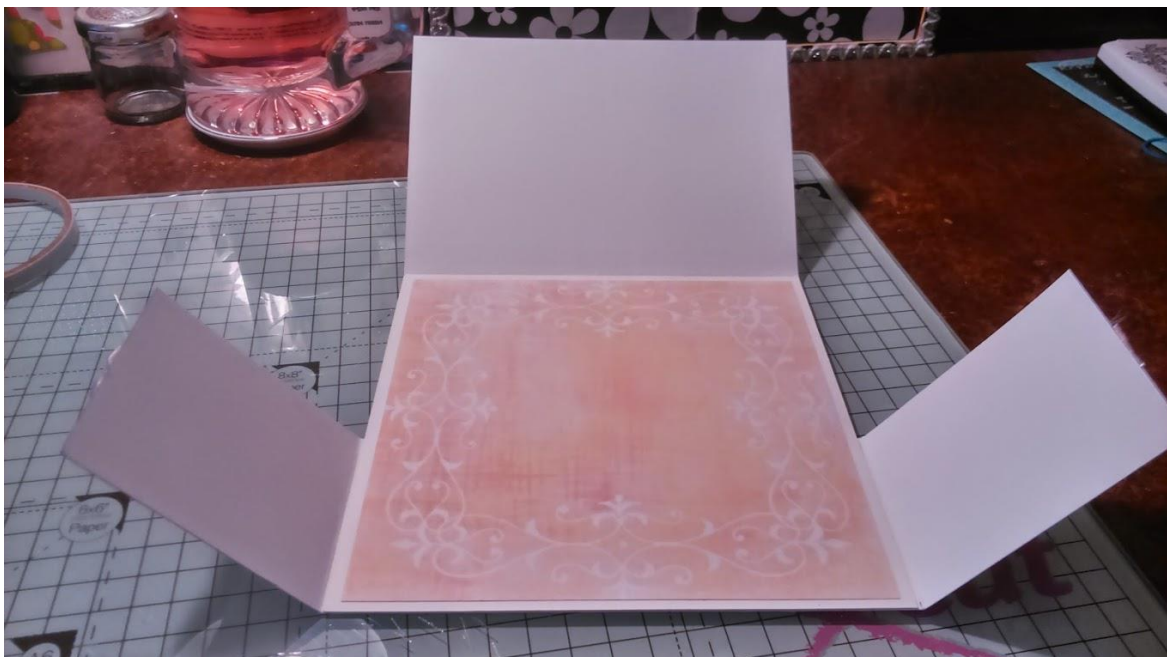

Take the base card back off and put double sided tape on the centre part of the strip.

Remove the backing and stick the base card firmly on. The front of the card should rest on the base flaps as shown below.

Now you can decorate, inside:

Outside:
